About Me

I am a tech enthusiast with a deep-rooted belief in the principles of humanity, complemented by strong technical and soft skills. Proficient in MERN development, I possess expertise in both frontend and backend technologies, enabling me to operate effectively as a full-stack developer. My passion lies in problem-solving and leveraging data structures and algorithms, where I excel from beginner to advanced levels. I actively engage in solving diverse DS questions across multiple platforms, continually expanding my knowledge and finding fulfillment in the learning process.

Professional Experience

Simplifii Labs Private Limited | Frontend developer Intern
Nov 2023 - Dec 2023
Key responsibilities:
- Worked as Frontend Developer Intern
- Contributed on making new college website
- I have experience working with a tech stack that includes HTML, CSS, JavaScript, and React.js, with deployment on GitHub.
- Developed strong professional, social, communication, and persuasive skills.

BLOGGER | Business and Lifestyle | grinpy.com
Jan 2024- now

- I have initiated my own personal blog website titled **grinpy.com**.
- Working on WordPress CMS to generate Blogs.
- I utilized Google tools such as Analytics, Console, and AdSense , employing advanced analytical techniques.
- learned SEO (On-page & off-page optimization) for posts

Projects

- Portfolio Website www.uttamupadhyay.online
- Worked on College Website making during Internship.
- Working on own Blogging website.
- Developing a management platform for society with MERN tech stacks.

Certifications

HTML,CSS&JS	Attained during internship.
